

## WE'VE DRIVEN UTILIZATION REVIEW PROGRAMS FOR TWO STATES.

When Mississippi and Illinois needed more savings and better efficiency for their Medicaid programs, they asked eQHealth Solutions to steer them in the right direction. Our utilization review solutions subsequently generated millions of dollars in savings for each state.

It all starts with eQSuite, our web-based prior authorization system. This technology, along with the guidance of our medical reviewers, helps ensure that only medically-appropriate care is authorized. Responsiveness is another eQ strength. Our provider support system has a track record of responding to inquiries within an average of 30 seconds, and resolves most within the first day.

To find out how our utilization review and management solutions can drive savings and efficiencies for your Medicaid program, call 225-926-6353 today. You'll discover how eQ can put its IQs to work for your state to improve health care.
